Daniel Tieu

Senior Product Designer for Healthcare, Connected Devices & Digital Platforms

danielvisual.com · danvisual.uxd@gmail.com · 510.221.6211 · linkedin.com/in/danieltieu · San Francisco Bay Area

Senior product designer with 12+ years in healthcare, consumer health, and regulated digital products. Most recently led design at Doctronic for the first AI-authorized prescription refill in the US, including EHR integration, trust-and-privacy patterns, and member-facing refill and consult experiences. Expert in translating complex health information into clear, accessible designs, partnering across Product, Engineering, Research, Clinical, and Brand to ship cohesive healthcare experiences at global scale.

EXPERIENCE

Product Design Lead | AI Health @ **Doctronic** *Feb 2026 – Jun 2026*

- Shipped the first AI-authorized prescription refill flow in the US — from early opportunity discovery through launch — including intake, eligibility, AI consult, and clinician review surfaces.
- Designed the EHR medical-records experience and a trust-and-privacy layer (memory controls, delete-consult, incognito mode) that let patients govern how AI used their data, core to converting skeptical first-time users.
- Translated complex clinical and compliance context into clear, accessible interactions by partnering with clinical, engineering, legal, and product leadership.
- Prototyped end-to-end AI workflows in Figma, Claude Code, and Claude Design to help the team evaluate complex behaviors, communicate product rationale, and refine solutions.

Sr. Product Designer | Telehealth Subscription @ **GoodRx** *Apr 2025 – Jan 2026*

- Shipped GoodRx's first telehealth subscription platform under HIPAA-compliant guardrails, bundling telehealth, prescription management, and discreet home delivery into one connected experience.
- Facilitated cross-functional workshops with Clinical, Legal, Content, and Product to translate complex regulated requirements into clear user-facing design decisions.
- Redesigned the ED subscription funnel, pushing signup CTR to an all-time high of 26.1%, up from 15.6%, through evidence-driven iteration with Research and Product.
- Shipped member-facing features including change shipping frequency, order history, cancellation survey, and delay next order to improve retention.

Sr. Product Designer | Enterprise Design Systems @ **The Estée Lauder Companies** *Oct 2023 – Apr 2025*

- Directed an enterprise interaction design library — tokens, motion guidelines, specs, and high-fidelity prototypes — adopted across 7+ luxury brands at global scale.
- Shipped Product Search & Filtering 2.0 with mobile-first filter logic, improving product findability across the portfolio.
- Translated brand principles into product experiences without compromising usability, accessibility, or trust.

Sr. UI/UX Designer | Consumer Health & Wellness @ **Amyris** *Sep 2021 – Aug 2023*

- Founding designer for Stripes Beauty, a 0-to-1 menopause wellness brand co-founded by Naomi Watts — concept exploration through prototyping, validation, and launch in 2022.
- Delivered omnichannel features across Biossance, JVN Hair, Rose Inc, and Costa Brazil including advanced search, cart/promo tools, and livestream shopping.
- Shipped shopping-funnel optimizations lifting conversion +25% and cutting bounce rate up to 40% across the health and wellness portfolio.

Interaction Designer | Education & Learning @ **Sephora** *Nov 2017 – Jan 2021*

- Built Sephora Education's first design system — patterns, interactions, color, typography, iconography, and pixel-perfect specs — across iOS, Android, and web.
- Completed an ADA-ready, mobile-first LMS migration that hit 4.5/5 satisfaction with 20K+ weekly course completions, serving 30K+ in-store hires.
- Led a team of 2–3 designers and producers through weekly critiques and collaborative design sessions, raising the bar on craft and accessibility.
